# GARDEN WORLD CYPRUS

Aluminium Seating Groups

GARDEN WORLD CYPRUS

# Aluminium Seating Groups

Our sets are designed and produced entirely for the outdoors. Its visual appearance is completed with baked powder paint on the aluminum frame.

Since the raw material is aluminum, the products are light but durable. It is easy to use and carry.

Wooden sections are produced using Teak or Iroko trees upon request. Wooden parts are polished after production to obtain a pleasant appearance and increase durability. Since the process of protective wood oil is very easy, it can be applied very easily by the user in the following years.

The cushions we use on the seating groups are made of UV-added olefin fabric, have water repellent properties and are completely suitable for outdoor use. Since our cushions have zippers, you can remove them whenever you want and wash them at 30°.

The sponges in our cushions are determined by our design team in 3 types according to the design of the set. Soft, super soft and hard. All our sponges used have a soft fiber wrap around them. In this way, a comfortable session is provided.

# Seating Group Coffee Tables

---

Our coffee tables, which we use in our sets, are produced in various sizes according to the design of the sets. In some of our sets, it is planned as a low table and in some of our sets it is multifunctional as a high table.

The frames of our coffee tables are made of aluminum material. Wooden parts are optionally produced from teak or iroko wood. The top of our tables is polished at the last stage and its durability is increased.

In some of our coffee tables, in line with the opinions of our designers, ceramic is used on the top tables, and glass laminate is used under the ceramic. Our glass laminated coffee tables; It is prepared in the form of 3 mm or 5 mm special ceramic on 8 mm glass. Ceramic color and decor can be selected from our ceramic color chart for your special orders.

On our coffee tables; Iroko table, ceramic table, ceramic table on glass laminate can be used on aluminum frame.

# Rope Knitted Sets

---

Convenient and comfortable with its modern design and ergonomics.

Rope wrap specially produced for outdoor use on an aluminum frame. The ropes applied on the product are durable materials with UV additives and produced entirely for outdoor use.

All the braids are made carefully by hand.

The aluminum frame is powder coated in different most preferred colors.

The wooden parts are made of outdoor-resistant original teak or, optionally, original iroko wood.

The fact that the cushions are removable is an important feature for storing them when not in use. In addition, the covering fabrics of all cushions used can be removed with the help of a zipper and are suitable for washing at 30°.

Our cushions made of olefin fabric do not retain water, dry quickly and are made for outdoor use. Cushion interiors are fiber winding on sponge. When you sit like this, it feels like cotton. Cushion thicknesses vary depending on the design and ergonomics of the set.

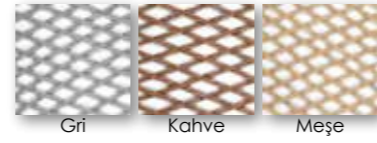

Special fillings that prevent deformation are used in the under-knee part of our cushions. It does not collapse or break easily. Thanks to the ergonomics of the cushions we use, comfort has been considered at the highest level in the waist area.

# GARDEN WORLD CYPRUS

Table - Chair Sets

# GARDEN WORLD CYPRUS

# Tables

---

Our tables are made of aluminum for outdoor use. Fixed for 4-6-8 persons according to need. We have tables of different sizes that can be opened and closed for 10-12 people.

Aluminum parts are shipped powder coated in standard colors such as anthracite, cappuccino, cream and copper. The tops of our tables can be produced in aluminum, iroko, teak, ceramic, glass laminate and ceramic coating. Our table legs are designed to maximize seating arrangement.

Our folding tables;

\*Opens on one side from the foot (+80 cm)

\*Opens from both sides (+50+50 cm)

\*It is produced as a single opening from the middle (+50 cm).

In tables with wooden tops, wood between 16 mm and 22 mm is used, depending on the design.

Our tables with ceramic tops are maximum resistant to scratches. Our tables are packaged disassembled and delivered to your home. They are easy to install. All installation guidance is included in the packages.

# Chairs

---

Modern outdoor chair, aluminum frame is manufactured sturdy and durable for outdoor use. Powder coating in different colors can be applied on aluminum.

There are plastic covers under the feet that prevent the aluminum from coming into direct contact with the surface. With its double layer of UV-resistant mesh that is resistant to external conditions and the foam inside, it provides a comfortable session that does not require a cushion.

The natural wood on the arms is made entirely of teak and iroko wood used for outdoor use. It has a protective polish on it. Since it can be stacked on top of each other, it takes up little space and is easy to store when not in use.
